SPEAKER AND AUTHOR

Terry Healey is a cancer survivor who endured over thirty surgical procedures in an effort to reconstruct his face, which was disfigured by a fibrosarcoma when he was only a junior at UC Berkeley. Through a long and arduous process, Terry realized that the scars on the inside had become far more disfiguring than the scars on the outside ever were.

Today, at the age of 42, twenty years after becoming disfigured, Terry is a professional speaker, author, businessman, member of the Leadership Council of The Wellness Community (SF-East Bay), and honorary board member of The Cancer League, Inc. Terry is President of Ridgeview Consulting, a firm that provides strategic marketing and sales program development consulting services for high technology companies, including Cisco Systems, Inc. Prior to consulting, Terry was the VP of Marketing for two high technology companies that both went public.

His popular program, *Navigating Life's Road Blocks: Attitude, Focus, and Teamwork*, is presented to companies and groups nationwide. He is the author of *At Face Value: My Triumph Over A Disfiguring Cancer*, released by Caveat Press in January 2006, and is a contributing author to two other anthologies. He has also been published in *Psychology Today*, *The San Francisco Chronicle*, *Guideposts*, and *Coping Magazine*. Terry has appeared on dozens of national and local TV networks, and has been interviewed on more than 50 radio stations across the U.S. and Canada.

Terry captivates and educates audiences on how to take control of their lives, identify and overcome challenges, build trust and teams, embrace change, and learn the value of tolerance and acceptance. He views the lessons he learned in life as gifts, and believes his greatest reward is being able to teach others how to overcome adversity and celebrate life.

Speaking topics and workshops include:

Navigating Life's Road Blocks: Attitude, Focus, and Teamwork

Based on his book, *At Face Value*, author Terry Healey takes you through his harrowing personal ordeal and what sustained him and enabled him to focus on the positive aspects of his life that weren't only lessons he learned, but gifts that he could impart to others struggling with their own personal challenges.

Turning Points and Survivor Kits

Through some personal storytelling, Terry conveys the importance of taking note of 'potential' turning points in life and how to ensure that you create your own personal survival kit that will help you with career challenges, personal discovery, or physical challenges that may change the way you interact with others.

Dealing With Adversity and Taking Control of Your Life

Based on Terry's extreme experience with adversity in his own life, Terry shares with us the lessons he learned about how to deal with adversity and how being focused and taking control of your life are the keys to making those difficulties not only tolerable but also valuable in our personal growth and development. Terry encourages the audience to confront things head on and to embrace, rather than fear our world that is constantly changing.

Embracing Our Differences

Terry focuses this interactive presentation on how truly different each and every one of us is, and demonstrates how we frequently make judgments of people that are oftentimes incorrect. Participants will walk away with a better appreciation for why we need to embrace diversity and strive to be more tolerant.

Eden Rivera, R.N., B.S.N., Assistant Patient Care Manager, 14 Long, University of California San Francisco (UCSF), January 23, 2002

"Your presentation was entertaining, enlightening and informative. You addressed the issues of acceptance, tolerance, growth and healing. You brought a sense of optimism and hope not only to others affected with cancer, but to all people. Thank you for sharing your story with the UCSF community."

Jenny Broberg, Univ. of Calif. San Francisco (UCSF, Public Affairs), October 17, 2002

"From the way some of the students responded, it was clear that they had been challenged to reconsider both how they view and judge other people and how they may be called upon to face the unexpected, perhaps even a crisis, in their own lives at some future time. You established a good rapport with the classes, because you spoke so honestly about yourself and your experiences. Students of this age are curious about what the future holds for them, and so your own directness, even acceptance of the extraordinary difficulties you faced was impressive to them."

Charlie Noland, Dept. of Religious Studies, De La Salle High School, Concord, CA, May 2, 2002
